

IT Essentials 5.0

10.3.1.2 Worksheet - Operating System Updates in Windows

Print and complete this activity.

In this activity, you will use the Internet to research operating system updates. Be prepared to discuss your research with the class.

1. Which operating system (OS) is installed on your computer?
2. List the configuration options available for important updates for the OS.
3. Which configuration option would you use to update the OS? List the reason for choosing a particular option.
4. List any other configuration options available for updating the OS.
5. If the instructor gives you permission, begin the update process for the OS. List all security updates available.
