

IT Essentials 5.0

5.3.1.13 Lab - Install Third-Party Software in Windows XP

Introduction

Print and complete this lab.

In this lab, you will install and remove a third party software application supplied by your instructor. You will install the Packet Tracer Windows application.

Recommended Equipment

The following equipment is required for this exercise:

- A computer system that is using Windows XP
- A flash drive or CD with the latest Packet Tracer Windows install package

Step 1

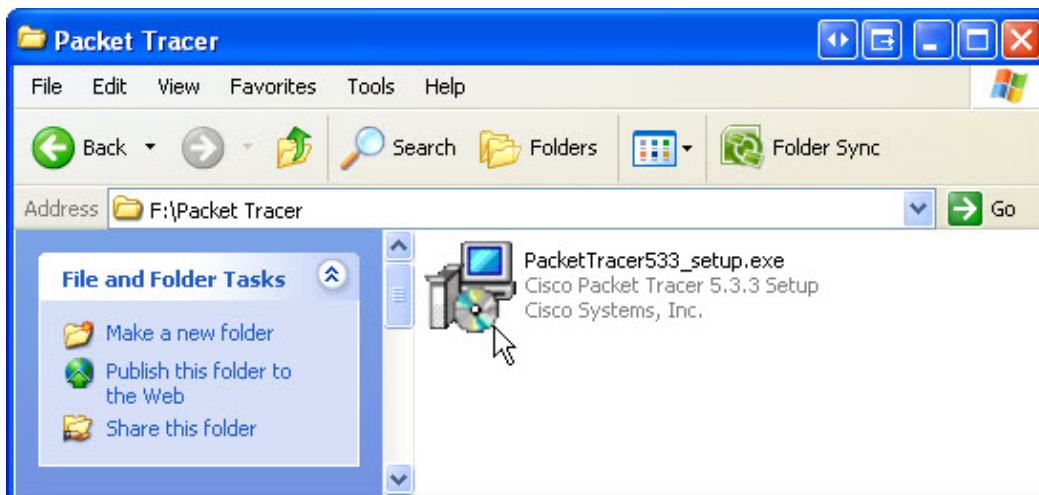

Log on to the computer with the Administrator account.

Use Windows Explorer to navigate to the Packet Tracer folder.

If installing from a CD, place the CD into the CD drive and navigate to Packet Tracer.

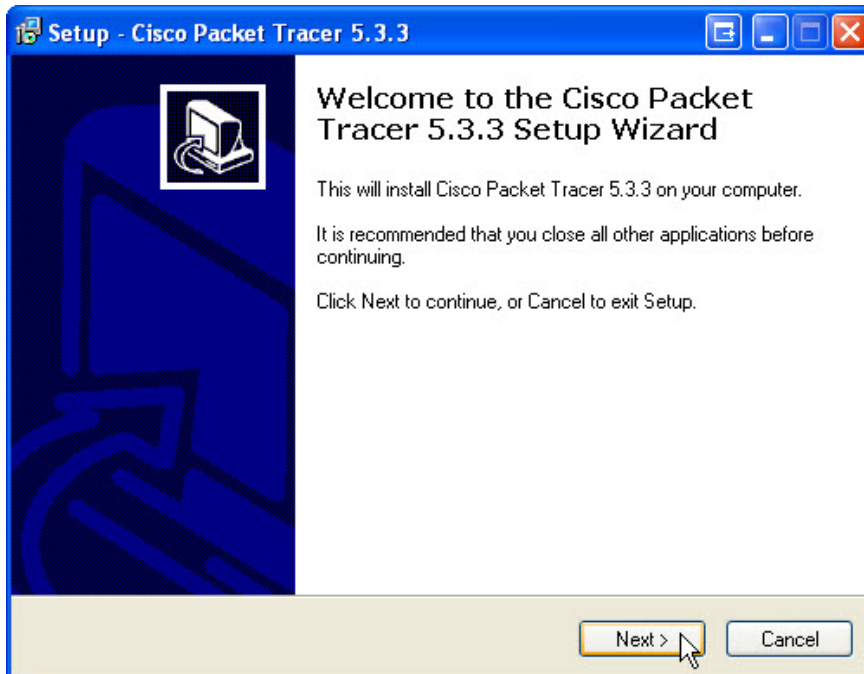

If installing from a flash drive, place the flash drive into a USB port and navigate to Packet Tracer.

Locate the PacketTracer###_setup.exe (where ### is the version number) application in the CD or flash drive. Double-click the **PacketTracer533_setup.exe** icon to start the installation process of the Packet Tracer application.

Step 2

The “Setup – Cisco Packet Tracer 5.3.3” window opens.

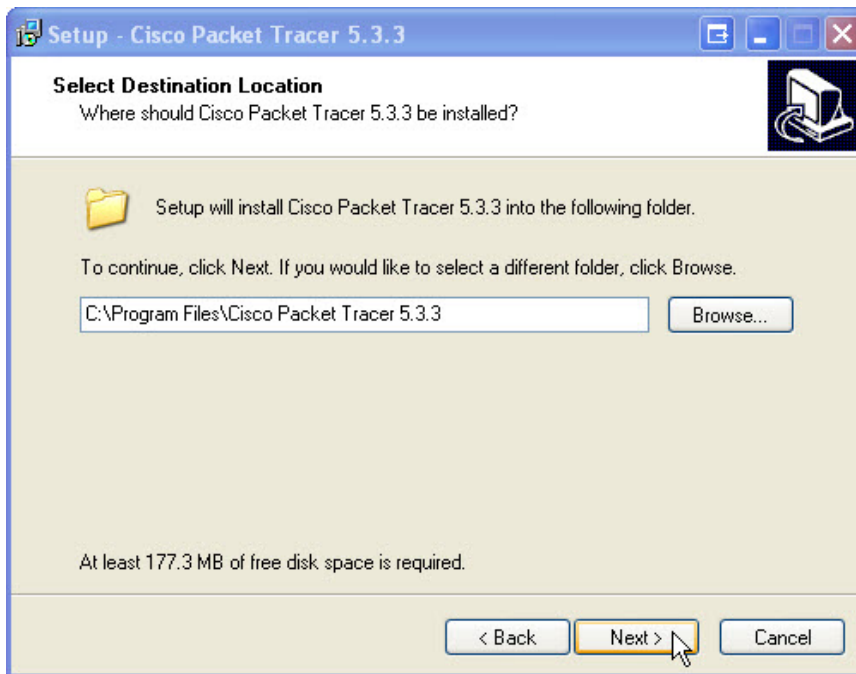

Click **Next**.

The "License Agreement" screen appears.

Select **I accept the agreement** and then click **Next**.

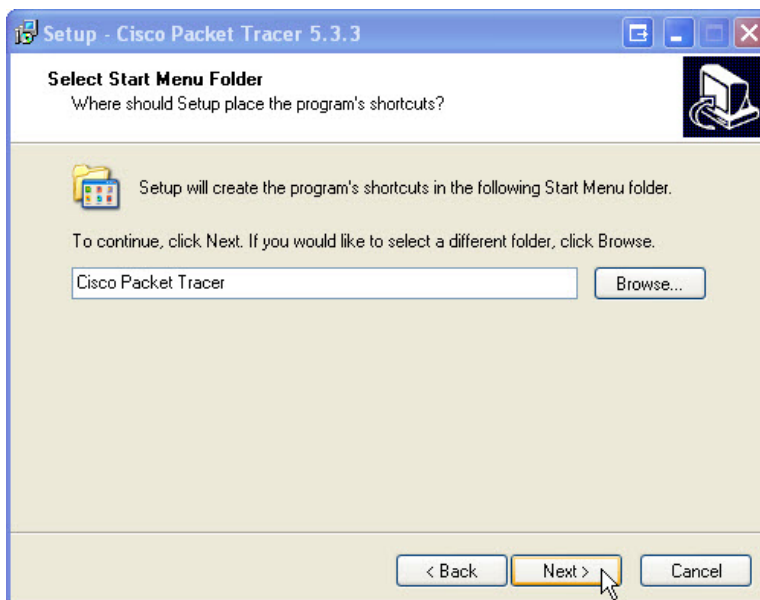

The "Select Destination Location" screen appears. Keep the default settings.

What is the default location for Packet Tracer?

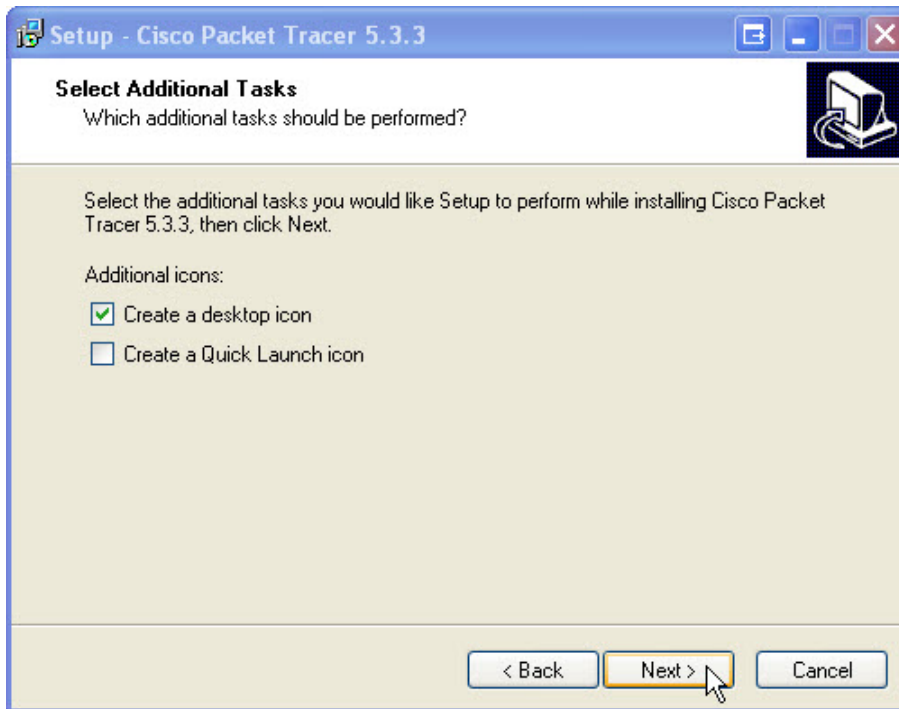

Click **Next**.

The “Select Start Menu Folder” screen appears. Keep the default settings.

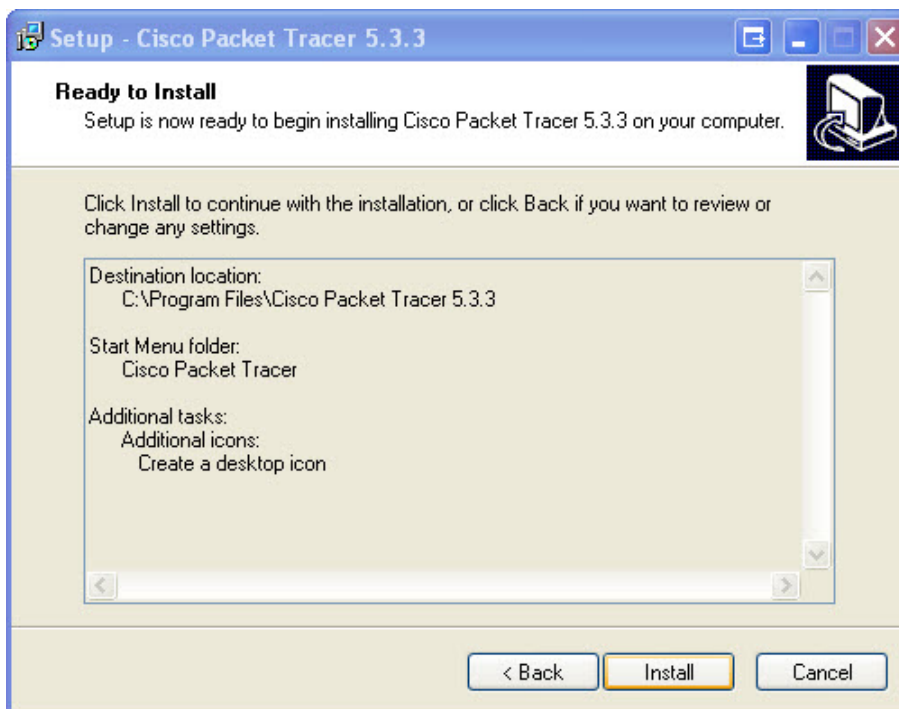

Click **Next**.

The “Select Additional Tasks” screen appears. Keep the default settings.

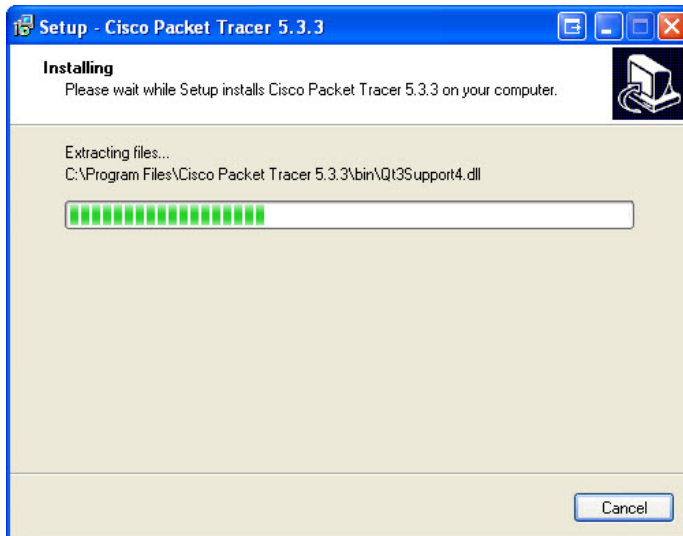

Click **Next**.

The "Ready to Install" screen appears.

Click **Install**.

The "Installing" progress screen appears.

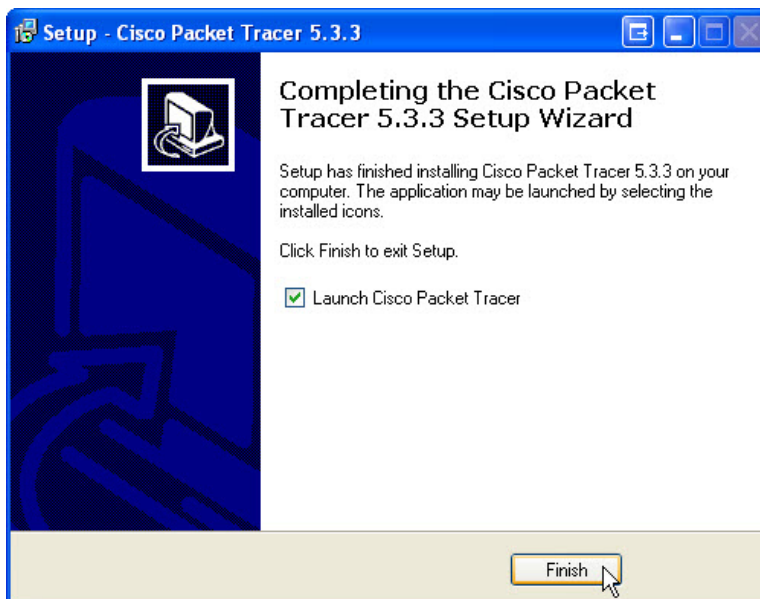

If an information screen appears, click **OK**.

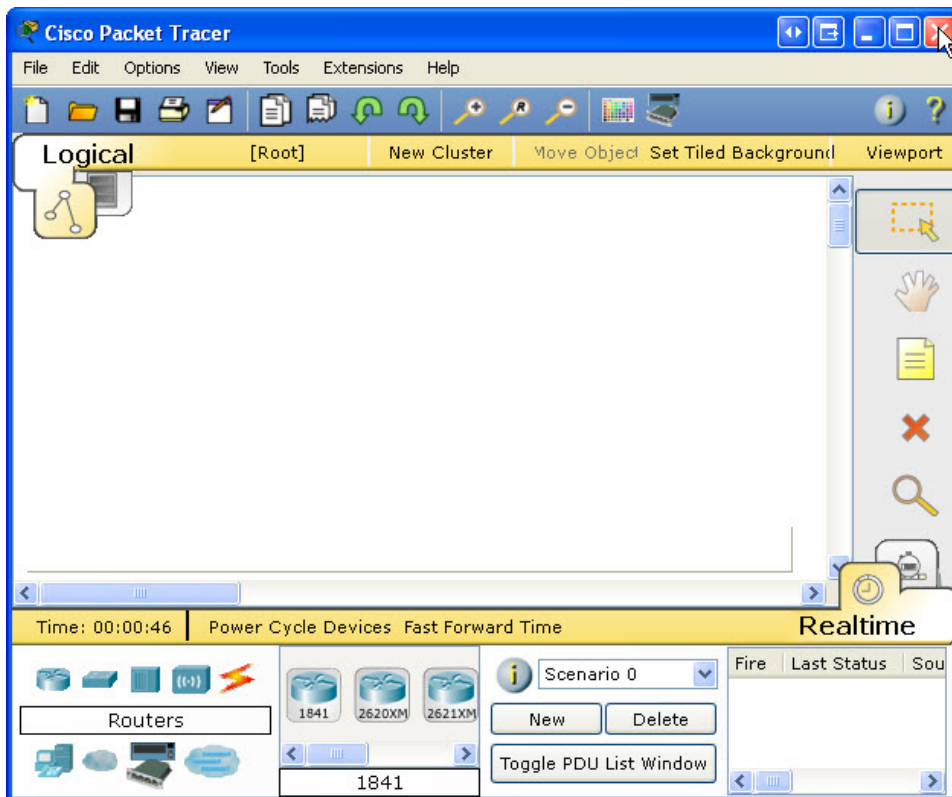

Do not close any programs or restart the computer.

The "Completing the Cisco Packet Tracer 5.3.3 Setup Wizard" screen appears.

Click **Finish**.

Packet Tracer starts.

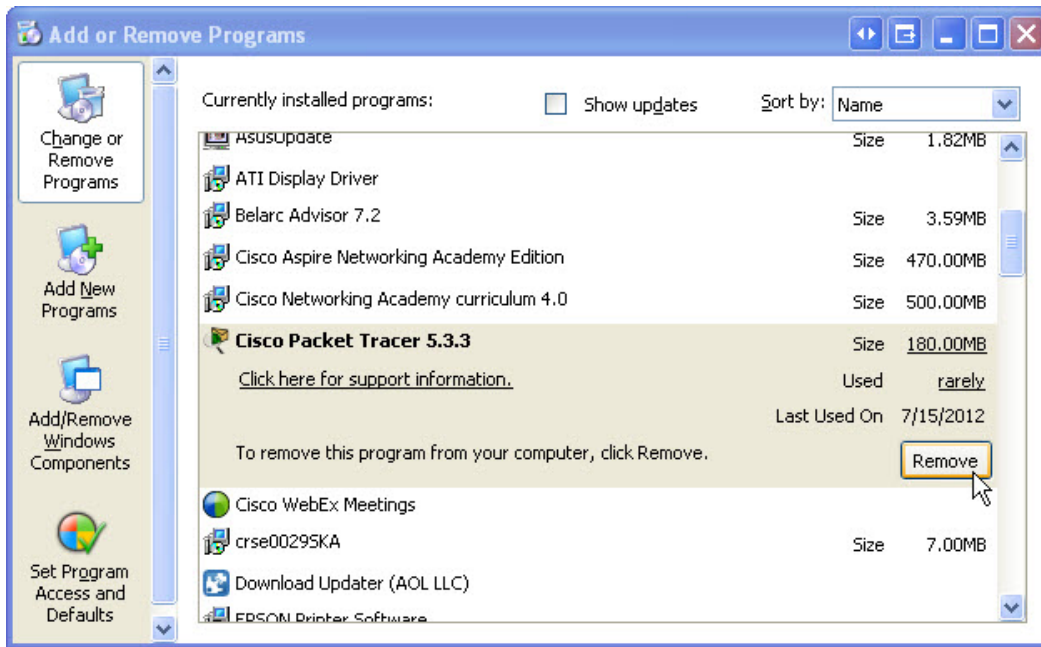

Close all open windows and restart the computer.

Step 3

Log on to the computer with the Administrator account.

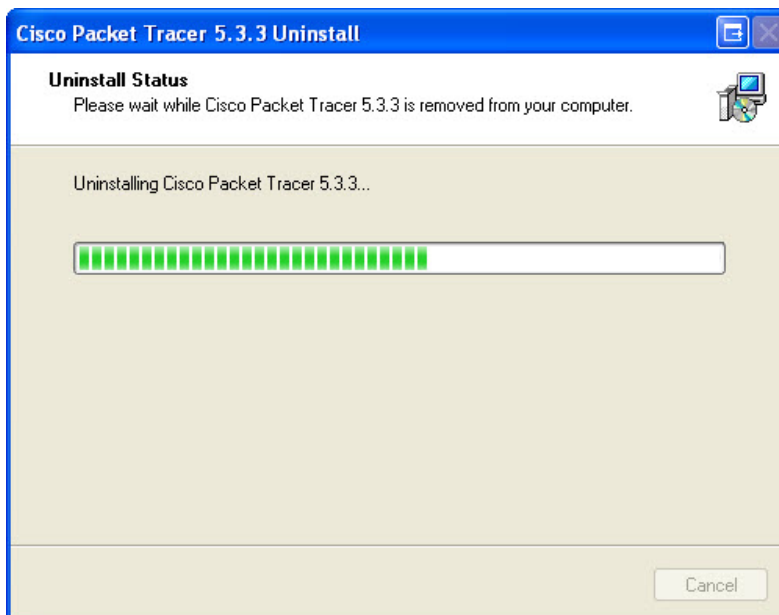

To uninstall a program, choose **Start > Control Panel > Add or Remove Programs**. Click **Cisco Packet Tracer** in the list. Click **Remove**.

Click **Yes** to confirm the removal.

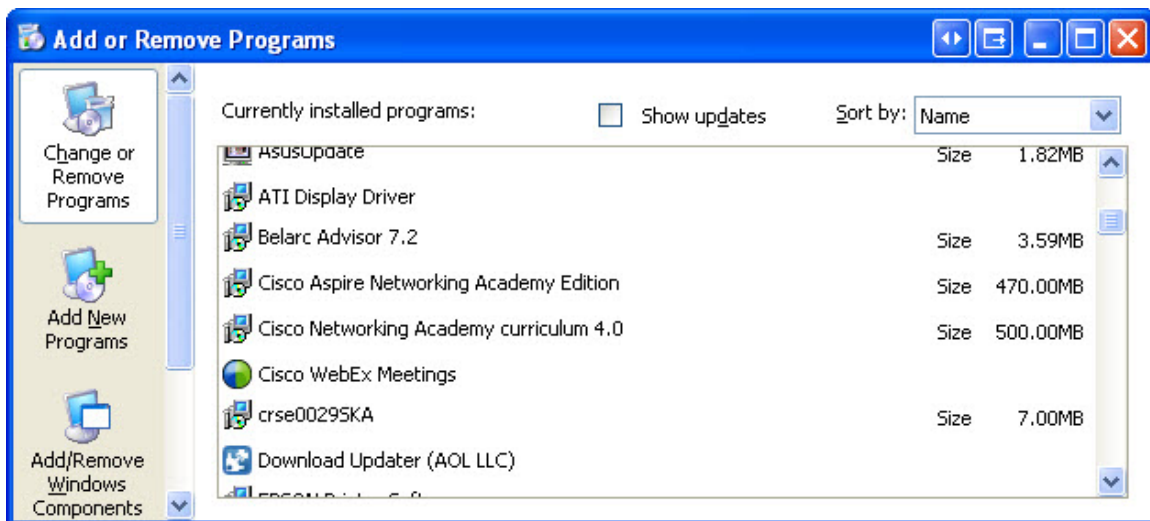

The “Uninstall Status” screen appears.

When the successfully removed window opens, click **OK**.

After the application removal process, the Add or Remove Programs window no longer shows the Cisco Packet Tracer in the list.

Why does Microsoft recommend using Add/Remove Programs to remove an installed application?
